4-in-1
eco-friendly laundry cleaner sanitizer
concentrate

4-in-1 cleans, bleaches, sanitizes, deodorizes **universal** ideal with all fabrics and colours **eco-friendly** free from alkyl phenol ethoxylates, EDTA, NTA and phosphate **cost-effective** up to 500 kg fabrics with 5 kg of powder **low temperature** efficient from 30°C **safe** tested according to VAH and DVV / RKI guidelines **lethal for 99%** germs.

biosanitizer L1

eco-friendly laundry cleaner sanitizer concentrate

lethal for 99% of germs

Effective from 30°C to preserve fabrics, Saniswiss biosanitizer L1 destroys 99% of pathogens from 60°C incl. bacteria, yeast, tuberculosis and virus (BPV) according to the VAH and DVV/RKI guidelines.

universal

Specially formulated to get immaculate laundry, purified and free from odors and pathogens. Ideal for cotton and polyester-cotton, for both coloured and white fabrics. biosanitizer L1 is suitable for all wash and machine systems and every water hardness. Suitable for automatic dosing systems.

4-in-1

biosanitizer L1 cleans, bleaches, sanitizes and deodorizes simultaneously. Based on laundry dirtiness, biosanitizer L1 offers cost-effective laundry cleaning while killing pathogens too.

hardness	pre-wash	main wash	1 bath
0-7 °d	10 g/kg	20 g/kg	30 g/kg
7-14 °d	15 g/kg	20 g/kg	35 g/kg
14-21 °d	15 g/kg	25 g/kg	40 g/kg
>21 °d	20 g/kg	30 g/kg	50 g/kg

For hygienic efficacy: 6 g/l, 60°C, 15 min.
(water: fabric ratio of 1:5)

enzymatic

Contains high active alkaline resistant enzymes for the removal of proteins based stains. biosanitizer L1 offers excellent removal of bleachable stains at low temperature (from 30°C).

ironing performance

Formulation includes innovative natural soap giving improving ironing performance.

pot 5000 g

code 132038

Conventional laundry cleaners are not sanitizers. Contaminated linen is a concern that goes beyond the hospital setting. Indeed, nursing homes, hospices, kinder garden, dental offices, clinics, doctors and other communities should also be concerned to prevent germ contamination in linen to avoid any costly cross-contamination. Saniswiss has developed a new one-shot powdered laundry detergent designed for hygienic low temperature washing of nursing home and food service textiles. biosanitizer L1 provides tangible cost savings to laundry operations thanks to shorter wash times, lower water usage and energy savings as it washes at low temperatures. Designed for hygienic washing of textiles starting at 30°C, biosanitizer L1 bleaches textiles safely and removes unpleasant smells. It contains a unique blend with high performing enzymes, and a high concentration of builders and detergent to leave your linen cleaner and brighter. Suitable for use on both white and colour fast fabrics, synthetics, and textiles with high hygiene requirement. biosanitizer L1 prevents any risk of spreading germs in fabric fibers, teats, and other pathogens.

meets EU standards ENs tested according to the VAH and DVV/RKI guidelines

bactericide, fungicide, tuberculocide and virucide (5 g per liter <15min. 60°C, bath ration 1:5) according to the VAH and DVV/RKI guidelines

composition

<5 % polycarboxylates, phosphonates, anionic and non-ionic surfactants. 5-15% soap and oxygen bleach.
