## biosanitizer S2 wipes

2-in-1

eco-friendly MD surface cleaner sanitizer wipes

**safe** with no hazard symbol **gentle** on sensitive medical devices **cost-effective** thanks to less evaporation **alcohol-free** to avoid cause of allergies **smart** the premium wipes that hold 30% solution **citrus** fresh fragrance **effective** on a wide range of pathogens **scientifically** developed for the medical field.

## biosanitizer S2 wipes

eco-friendly MD surface cleaner sanitizer wipes

In the same spirit as our eco-friendly water-based sanitizers for disinfection of medical device surfaces, we developed an additional range specifically for those that look to cost-effectiveness as a priority but without compromising the antimicrobial efficacy. Unlike other alcohol-free sanitizers, Saniswiss biosanitizer S2 wipes are fast-acting and offer a wide spectrum against various pathogens incl. MRSA, VRE and spores of clostridium difficile. It is available in a variety of sizes and packaging as well as in wipes and liquid, depending of the application requested.

### safe

With no hazard symbol, Saniswiss biosanitizer S2 wipes can be used safely according to the instruction for use mentioned on the label. Its citrus fresh fragrance makes it a preferred choice masking other unpleasant odors.

### gentle

Scientifically developed for sensitive medical devices and surfaces, incl. the upholstery of the medical examination chairs, Saniswiss biosanitizer S2 wipes preserve the natural suppleness of such surfaces, preventing drying, cracking or peeling.

### cost-effective

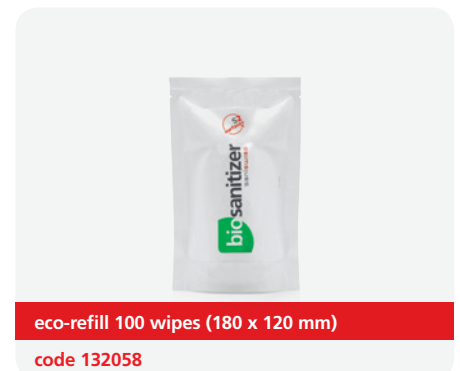

Sanitizing wipes for surfaces of medical device disinfection are ready-to-use. Thanks to its special formulation free from alcohol, free from aldehyde, free from phenol, there is less evaporation during wiping, saving cost and ensuring a compliant disinfection.

### alcohol-free

Using alcohol in a medical environment can cause allergies, lung diseases and skin dryness for patients as well as for staff. These hazards can effectively be overcome by using biosanitizer S2 wipes, even intensively.

### smart

Available in practical wipes and maxi-wipes, Saniswiss biosanitizer S2 wipes cover all needs for convenient use on medical device surfaces. Unlike classical wipes, our premium wipes are made of a unique material that holds the solution 30% more, preventing expensive evaporation and improving the wetness on surfaces.

### meets EU standards ENs

#### bactericide activity according to EN 13727

- MRSA
- VRE echerichia coli
- pseudomonas aeruginosa
- enterococcus hirae
- staphylococcus aureus
- salmonella typhimurium
- listeria monocytogenes
- legionella pneumophila
- serratia marcescens
- proteus mirabilis
- klebsiella pneumonia

#### yeasticide activity according to EN 13624

- aspergillus niger
- candida albicans
- penicillium chrysogenum
- penicillium verucosum

#### mycobactericide activity according to EN 14204

- mycobacterium terrae
- mycobacterium avium
- mycobacterium bovis

#### viruses activity according to EN 14476

- against BVDV surrogate of HCV
- against PRV surrogate of HBV
- vaccinia virus as surrogate HIV
- influenza
- H5N1
- H1N1
- herpes simplex virus
- rotavirus

#### spores activity according to EN 13704

- cladosporium cladosporioides
- clostridium difficile spores

#### composition

aqua, benzalkonium chloride, C12-14 alkyl ethylbenzylammonium chloride, didecyldimethylammonium chloride, 2-propanol, C9-11 Pareth-8, peracetic acid, PPG-2 methyl ether, polyaminpropyl-biguanide, cocamidopropyl betaine, tetrasodium EDTA.
