Environment policy of Clinichem Oy Ltd.

Clinichem Oy Ltd. (Company) is an importer and supplier of equipment and consumables, and a manufacturer of test products. The products are used for hygiene care purposes by the health care-, veterinary-, laboratory-, research- and welfare sectors and medical industry.

The Company is known as an environment concerned operator.

The Company manufactures and trades the products according to the profitable basis and good and commonly accepted principles trying to fulfil the requirements that are set regarding environment protection by the authorities and majority of the customers, and developing in it. To assure that, the Company has established a documented environment system that is kept up and that is followed to minimize the unnecessary burden on the environment. The instructions and rules that are registered in the system are followed by each employee of the Company. The knowledge of the employees is kept up and updated by sufficient training and education. To the new employees the requirements of the system are presented at the briefing stage.

The ultimate aim of the environment system is to minimize the unnecessary burden on the environment by reducing the material and utility usage through the whole line in products, product packages and daily operation. Additionally the Company proceeds towards reusing and recycling the re-utilizable materials. The hazardous waste is supplied to the authorized, professional companies for handling.

Environment managing in the Company is implemented through the follow up of the environment policy based operations. The realization of the environment policy based operations is controlled by the Operative Board. The Operative Board makes surveillances in it's meetings and decides of the development actions.
